Commerce is notifying the public that the final judgment in this case is not in harmony with Commerce's final results in the 2015 administrative review of solar cells from China, and

### SUPPLEMENTARY INFORMATION:

#### Background

On July 23, 2018, Commerce published its final results of the 2015 administrative review of solar cells.<sup>1</sup> Commerce reached affirmative determinations for mandatory respondents Canadian Solar Inc. and its cross-owned affiliates (collectively, Canadian Solar) and Changzhou Trina Solar Energy Co., Ltd. and its cross-owned affiliates (collectively, Trina Solar), as well as numerous other producers and exporters not selected for individual review. Commerce requested a voluntary remand regarding four issues before the Court: (1) Its finding, based on adverse facts available, that the respondents used the Export Buyer's Credit Program; (2) its determination that China's provision of aluminum extrusions is a specific subsidy; (3) the decision to average two datasets from IHS technology and U.N. Comtrade in calculating the benchmark for aluminum extrusions; and (4) the determination that China's provision of electricity is a specific subsidy.

On February 25, 2020, the Court granted Commerce's requests for voluntary remands, and remanded additional aspects of Commerce's *Final Results*.<sup>2</sup> Specifically, the Court concluded that Commerce did not adequately explain how the polysilicon market in China is distorted through GOC intervention and how that distortion affects prices for imported products.<sup>3</sup> Additionally, the Court found that Commerce had misinterpreted evidence regarding the
